DOUBLE WALL CORRUGATED (PROFILED) PIPE

With smooth internal and corrugated (profiled) external surface for non-pressure underground drainage and sewerage.

Pipes for Non Pressure Underground Drainage and Sewerage Application

“D-Rex” is an innovative product aptly described as structured wall piping system with smooth internal and corrugated (profiled) external surface. The corrugated (profiled) external surface of the D-Rex pipes gives the product excellent ring stiffness (load bearing capacity). Unlike plain pipes, D-Rex pipes do not deform under vehicular traffic load. Furthermore, since these pipes are moderately flexible, they can be aligned comfortably even in gradually bending paths.

The inner wall, which is fused with the outer wall, is smooth and facilitates laminar flow of liquids / slurry. This results in lesser possibilities of pipe clogging, deposition of debris in the pipe path etc.
